

CALSTONE

Because Quality Matters

AIA and ASLA Continuing Education Programs

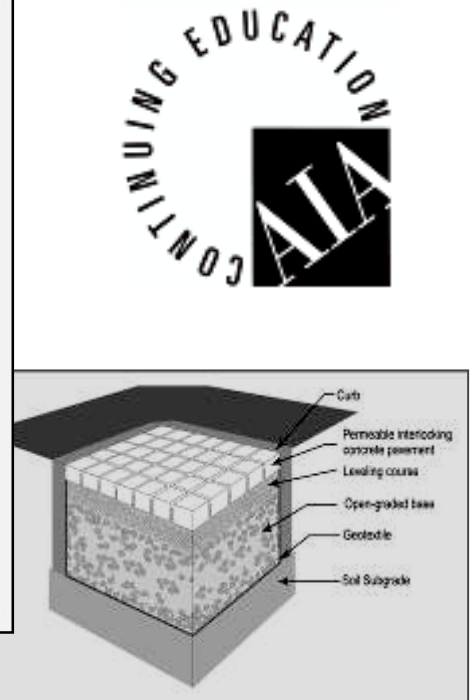

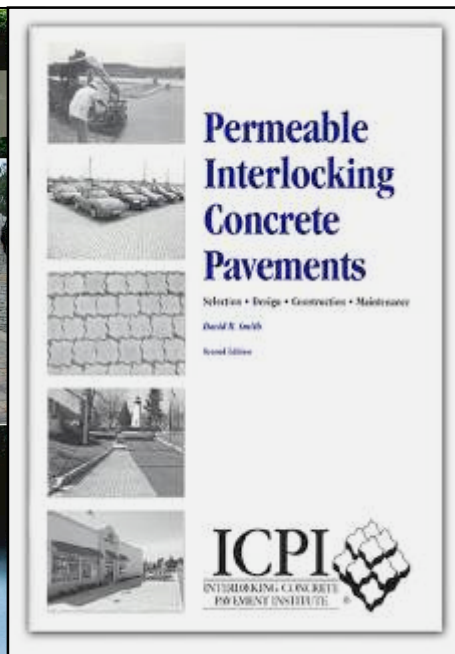

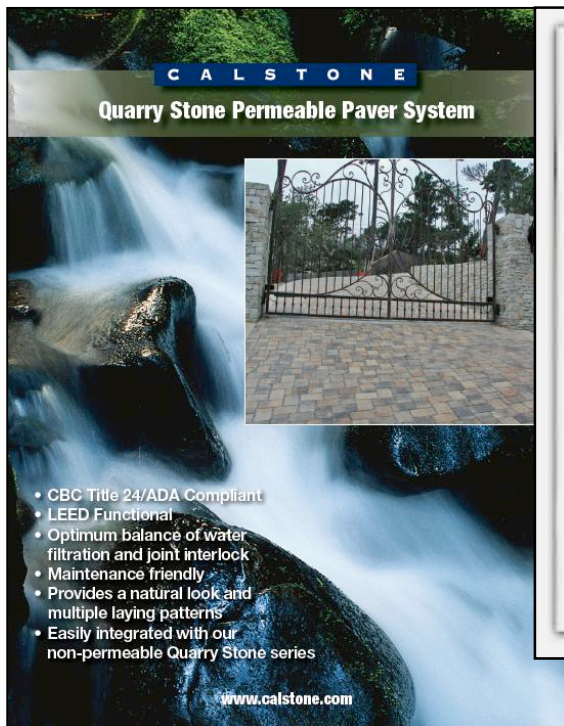

Calstone, a manufacturer of quality hardscape products, in conjunction with the Interlocking Concrete Pavement Institute (ICPI) is offering complimentary lunch and learn style presentations on Permeable Interlocking Concrete Pavements. These accredited programs can be presented at your location with your active schedules in mind.

Course Objectives:

Advancement of Permeable Interlocking Concrete Pavements (PICP) towards pollution control and control of stormwater runoff. Discussion of Best Management Practices (BMP) and **LEED credits** available in design options are included. Advantages and limitations of PICP's will be covered in this one hour course. Session options to choose from include:

- **Lunch & Learn** (complimentary box-lunch style – noon time)
- **Brunch & Learn** (complimentary pastries, juice & coffee – morning time)
- **Anytime Learning** (including after business hours – complimentary pizza if requested)

HardScapes 101

*Interlocking Paving Stones
Segmental Retaining Walls*

Speaker Profile

Your course presenter, Brian McThorn, has over 25+ years of experience in the hardscape and construction industry. Over the past 12 years, he has worked with leading concrete manufacturers as a product representative for contractors, distributors, architects and engineers.

Brian was a senior project manager/senior estimator for both union and open shop paving stone installation companies. He is a certified ICPI instructor and works closely with their guidelines, practices and recommendations. He brings a vast history of product knowledge, value engineering and presentation skills.

During his tenure as a manufacturer's representative, Brian has instructed and trained over 3,000 individuals in seminars, hands-on demonstrations and certification courses. He has instructed contractors, designers, engineers and home owners to the benefits of segmental retaining walls, interlocking paving stones and permeable pavement systems.

Brian's company, **HardScapes 101**, is an independent consulting firm that specializes in all aspects of the paving stone and retaining wall industries. Working directly with architects, engineers and contractors, he brings an unbiased approach to expanding the knowledge and success of a vastly growing market.

Contact HardScapes 101 directly to schedule your AIA/ASLA continuing education "Food 4 Thought" program.
